VYCON Names Dann McKeraghan Vice President of Sales

Clean Energy Flywheel Company Experiences Rapid Growth

LOS ANGELES – December 2, 2009 — VYCON (www.vyconenergy.com), the designer and manufacturer of award winning environmentally-friendly, high-speed DC energy storage flywheel systems, announced the appointment of Dann McKeraghan to vice president of sales, power quality markets.

McKeraghan joined VYCON in October 2008 as director of sales for North America. Under his direction, strategic programs were initiated that included establishment of industry alliances, increasing awareness in the market for VYCON's unique flywheel technology, building of a world class sales team and implementation of proven sales processes for large capital equipment . Through his leadership VYCON sales in the power quality market has expanded to record levels for the company.

In his new role as vice president of sales, power quality markets, McKeraghan will be responsible for increasing field sales support, channel expansion and the continued sales growth of VYCON's VDC and VDC-XE Direct Connect DC power systems that protect mission-critical power quality applications. These innovative, clean DC energy systems bring environmentally friendly "green" backup power to data centers, hospitals, broadcast studios, gaming centers and manufacturing plants.

During his 20-year career, McKeraghan has held key positions with power quality leaders such as Eaton, Exide Electronics and Power Distribution Inc. Prior to joining VYCON, McKeraghan was with Eaton Corporation where he managed the Central Zone for Eaton's Powerware brand of Uninterruptible Power Systems (UPSs) and associated power quality solutions for nearly a decade.

"Dann has been a major contributor to Vycon's success in the power quality markets. His expanded role will allow him to play an even greater role in the development of products, channels and markets worldwide," commented Frank DeLattre, president of VYCON.

About VYCON

VYCON is an innovator in the design and manufacture of technologically advanced flywheel energy storage systems that enable a highly reliable, cost-effective and "green" energy storage solution for a variety of applications. The company's REGEN flywheel systems, used in regenerative power applications such as container cargo handling crane applications and light electric rail, reduce power and energy costs to port and rail operators as well as provide a reduction in green house gasses. In addition, VYCON's line of VDC and VDC-XE systems are deployed in mission-critical operations around the world protecting critical computing assets against costly power outages.

For more information on VYCON's innovative green power solutions, contact VYCON at 714-386-3800 or visit VYCON's web site at: www.vyconenergy.com.
